Curriculum Vitae

PROFILE

Health economics PhD student with knowledge in health economic evaluation, health care management and health economics based on courses offered at university and 5-year research experience; trained in econometrics; health economic modelling; discrete choice experiments; and data visualization; knowledge of and interest in well-being research, evaluation of health care programs and products, estimating the monetary value of health, and health state valuation.

EDUCATION

09/2017-present	**PhD Candidate, Erasmus University Rotterdam** Erasmus School of Health Policy & Management, Health Economics Section PhD thesis scheduled to be submitted in March 2022 **Thesis topic:** "Valuing health & well-being – Extending the scope and empirical basis of health economic evaluations." In my doctorate, I am applying economic and statistical tools, including applied econometrics, health economic modelling, and discrete choice experiments, to conduct research on topics surrounding tools to inform the efficient allocation of health care resources. This especially includes eliciting preferences on the importance of different (health-related) quality of life dimensions and obtaining societal monetary valuations of health and well-being gains.
09/2017-12/2020	**Marie Curie Fellow** European Training Network - Improving Quality of Care in Europe "IQCE" (https://www.iqce.eu/). Funded by the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement No 721402.
04/2013-05/2016	**M.Sc. Health Economics, University of Bayreuth, Germany** Overall GPA: 1.4 (First Class) Thesis: "Does the introduction of a prospective payment system influence the length of stay in hospitals? A quantitative analysis using aggregated data from Germany" (Supervisor: Andreas Schmid; grade: 1.0)
08/2014-05/2015	**Visiting Scholar, University of North Carolina at Chapel Hill** Gillings School of Global Public Health, Department of Health Policy and Management
10/2009-04/2013	**B.Sc. Health Economics, University of Bayreuth, Germany** Overall GPA: 2.4 (Second class – upper division)

REVIEWING ACTIVITIES

Economics & Human Biology (1)

European Journal of Health Economics (2)

Value in Health (2)

Health Economics (1)

Population Health Metrics (1)

FURTHER RESEARCH EXPERIENCE

07/2016-12/2018   **Research Associate, WifOR GmbH, Darmstadt, Germany**
Health Economic research

- Working in and leading of research projects measuring the societal impact of different innovations on productivity by adopting and developing health economic models, creating population models and establishing a link between clinical outcomes and productivity
- Performing societal benefit-cost analysis and accounting for uncertainty through probabilistic sensitivity analysis
- Assisting in developing a burden of disease analysis for type 2 diabetes in Germany

12/2015-05/2016   **Student Assistant, Hannover Medical School (MHH), Hannover, Germany**
Institute of Epidemiology and Health Systems Research

- Writing of research proposals for the German Innovation Fund

- Drafting publications and preparing presentations for international conferences

06-10/2015   **Internship, inav-GmbH (Institut für angewandte Versorgungsforschung), Berlin, Germany**
Research Assistant for health economic modeling and evaluation

- Conducting literature reviews using PubMed for two indications to gather input parameters for health economic models
- Developing an economic model for the post-acute care of stroke in Germany and adopting a cost-effectiveness model from the British to the German context

TEACHING EXPERIENCE

2021   **Tutor, Erasmus School of Health Policy & Management**
Advanced research methods

2020; 2022   **Tutor, Erasmus School of Health Policy & Management**
Measuring patient preferences using Discrete Choice Experiments

2019-2021   **Tutor, Erasmus School of Health Policy & Management**
Global Health Economics

2019-2022   **Supervisor, Erasmus School of Health Policy & Management**
Master thesis supervision (9)

2019   **Tutor, Erasmus School of Health Policy & Management**
Quantitative Research Methods

05-08/2015   **Student Assistant, University of Bayreuth, Bayreuth, Germany**
STATA instructor for Empirical Health Economics

SKILLS

Methodology: Discrete choice experiments, Statistical modelling using Markov chains and decision trees, survey design, linear and non-linear regression analysis, panel data analysis, theory of economics of health and health care

Software: STATA, R, Ngene (DCE design software), Lighthouse Sawtooth (Survey software)

Languages: German (mother tongue), English (business fluent), French (beginner), Dutch (beginner)

PROFESSIONAL AND ASSOCIATION MEMBERSHIPS

Working group of health economics and management (AKGM e.V., Bayreuth)

German Society for Health Economics (DGGÖ)

Open Science Community Rotterdam (OSCR)

Erasmus Choice Modelling Center (ECMC)
